Our Services

• AI & ML Solutions

The selection of tools and software for AI and ML solutions depends on project needs, objectives, data scientists' and developers' preferences, and can involve both native and hybrid technologies.

• Enterprise Architecture

We specialize in strategy consulting to guide organizations in seamlessly integrating Al machine learning into their operations. Our tailored solution design ensures that Al systems align perfectly with organizational goals.

Learning content

We employ Learning Management Systems (LMS) to efficiently manage and deliver eLearning content, equipped with tools for course creation, assessments, and performance analytics.

Mobile App

We employ Learning Management Systems (LMS) to efficiently manage and deliver using native as well as hybrid technologies. Through this experience we commit to excellent user experience and desired business value.

• Virtual Reality Apps

These services include a wide range of VR and AR applications, such as games and experiences, training and simulation programs, and counseling applications, education and learning programs, and tours and experiences.

Digital Content

Our focus has been on gamifying learning. Our gaming lab is fully equipped with technology knowhow and passionate team which is just right to translate your vision to reality.

Gaming App

The specific tools and software used in visual communication design will depend on the needs and goals of the individual project, as well as the preferences of the designer.

Our Products

Maritime LMS

A Maritime Learning Management System (LMS) is a product developed for the maritime industry to facilitate the training and development of seafarers. It is a web-based platform that provides a comprehensive suite of tools to manage, track, and deliver maritime training courses.

Virtual Reality LMS

A Virtual Reality Learning Management System (VR LMS) is an educational technology platform that combines virtual reality (VR) technology with a learning management system (LMS) to create an immersive training experience for learners Professionals.

Flix Microlearning Video Platform

Flix is a microlearning video platform developed that provides organizations with an effective and efficient way to deliver training and education to learners. The platform is designed to offer short, concise, and engaging video content that can be easily consumed by learners.

Mentors-Mentoring Platform

The mentoring platform app can be used in various industries where mentoring relationships are important for personal and professional development. The app provides a convenient and efficient way to connect mentors and mentees and facilitate skill-based mentoring relationships.

Project Management Software

Our project management software offers a comprehensive suite of features designed to streamline project workflows, enhance collaboration, and ensure project success. From intuitive task management and collaborative communication tools to agile project planning and resource allocation, our software empowers teams to work efficiently, adapt to changing project requirements, and deliver value to clients.
